RESEARCH EXPERIENCE	<ul style="list-style-type: none">• City University of Hong Kong, HK SAR, China 2018.09 – Current Research in computer vision, mainly focus on deep learning and image processing.
PREPRINTS AND PROJECTS	<ul style="list-style-type: none">• Image Specular Highlight Removal 2018.09 – 2019.03 Specular highlights are everywhere in our daily lives. However, they are often undesirable as they can severely bury the details of objects in the scene and degrade the image qualities. This project aims to address the problem via deep learning and synthesized data. draft• Single Image Heavy Rain Removal 2019.04 – 2019.11 Heavy rain contains not only rain streaks but also fog. Supervised learning for rain removal requires a lot of annotated ground-truth images or synthesized images, which is usually impractical. To alleviate this problem, this project aims to exploit unsupervised domain adaptation. report
